

Specifications for printing files

PDF files ready to print are to be made to the PDFX-1 standard. Dimensions stated in width x height. PDF files should be made in gross format = net format + bleeds 2 cm for cutting all around. There should be no cutting marks or colour bars in the files.

Files made as single-sided PDF-files - named with Printfactory quotation no.

Files made with following resolution:

Textile: 100 dpi

Solvent: 150 dpi

at 100% scale.

PDF files should be up-loaded to our FTP-server:

Server adress: <ftp.printfactory.dk>

User: kunder

Password: velkommen

Printfactory prints in CMYK. Black is defined: 100, 100, 100, 100 – black text K100.

Pantone colours will be converted to CMYK.

For specific colour demands we recommend that you order a colour sample.

Text and logo should be placed min. 3 cm from the edge, as many textiles are shrinking.

Do you want to know the price, if Printfactory should adjust a file for printing or do you have any questions regarding the above, please contact us.
